

Final Grading Rubric

Criteria	Points	Specification
Bracket Creation	/6	Able to create a bracket and add it to the database of brackets. It should be viewable from the '/bracket',
Bracket Voting	/6	Functionality of voting on a bracket added. No voter should be able to vote on a bracket more than once. The bracket template should show the number of votes that each entry has.
Bracket Round Process	/6	Enable the creator of a bracket to process the round, and have the new teams. The user should be able to provide 4,8, or 16 teams, and set the title, description and entries for each team. They should also be able to make it private so only users with the URL can vote on the bracket.
View User Brackets	/3	Enable a user to see all of the brackets he or she has created.
Bracket Deletion	/2	Enable the creator of a bracket to delete the bracket.
Template Testing	/2	Automatic testing of the templates and server-side data structures
